

Can you count
eleven pollinators
on this page?

BLACK SWALLOWTAIL

Bees aren't the only pollinators!
Birds, butterflies, beetles, and other
insects help with the important work
of pollination.

Did you know?

Electrostatic forces
help grains of pollen
"jump" onto bees.

Genus: *Bombus*

BUMBLEBEE

Bumblebees are
large and fuzzy!

HONEY BEE

Genus: *Apis*

Honey bees are smaller
than bumblebees.

HELP COUNT POLLINATORS NEAR YOU!

Populations of pollinators are declining around the world.
By gathering observations of bees, butterflies, and other
pollinators, you can help scientists understand pollinator
health and keep our wildlife communities vibrant.
